## 5. KNOWN ISSUES

- Upgrade From Previous Versions of Software

- **Users with a 1.2.x version of Mail for Exchange:**

If any previous version of the Mail for Exchange client is installed on the phone it must be uninstalled and the phone must be restarted (power off then power on) before version 1.5.0 is installed. The user will have to re-create and save their profile.

- **Users with a 1.3.x version or later of Mail for Exchange:**

If the device has the 1.3.x client or later, the user can simply upgrade that copy by installing the 1.5.0 client over it. Profile is preserved and useable after upgrade.

- Mail for Exchange application shows incorrect connection status when device loses GPRS coverage

## 6. NOTES

- Using Nokia PC Suite to sync emails, contacts or calendar entries after installing and using Mail for Exchange on your phone will corrupt the phones memory
